

Little Bells Newsletter

Week Ending 23.05.19

It's only been a short week but we have packed lots of learning in. Our mini-beast topic has been lots of fun, we have had a visit from Mr Clemson who has shown us his mini-beasts, snakes and a scorpion. The children got to handle them and learnt some interesting facts. We have been sorting mini-beasts into groups; legs, no legs, wings etc.

In maths we have been playing games using dice to identify how many bugs go on the leaves. We had dice with numbers on to help with number recognition and dice with spots on.

In PE we have played a game moving like a mini-beast and a team game throwing bean bags that the children seemed to enjoy. We have also been lucky with the weather, which has enabled us to have the door to the outside area open lots this week, so the children have used the sand pit, bikes, scooters and the mud kitchen.

Thank you to all the parents that attended our mini-beast welly walk hunting for bugs in the outdoor area. We managed to see a ladybird, a slug, some flies, a bee and other mini-beasts.

I can't believe we are almost in the last part of the academic year before some children move into reception class, time goes very quickly! Our topic next half term is holidays, transitions and hopefully some outdoor fun! We have our school trip to the farm in July and payments and consent can be completed online. Thank you to those who have already paid.

Enjoy the week off and I will look forward to seeing you all the week commencing the 3rd June.

Have a lovely weekend,

Mrs Drugan
